

Area Wide Control Program (AWCP)

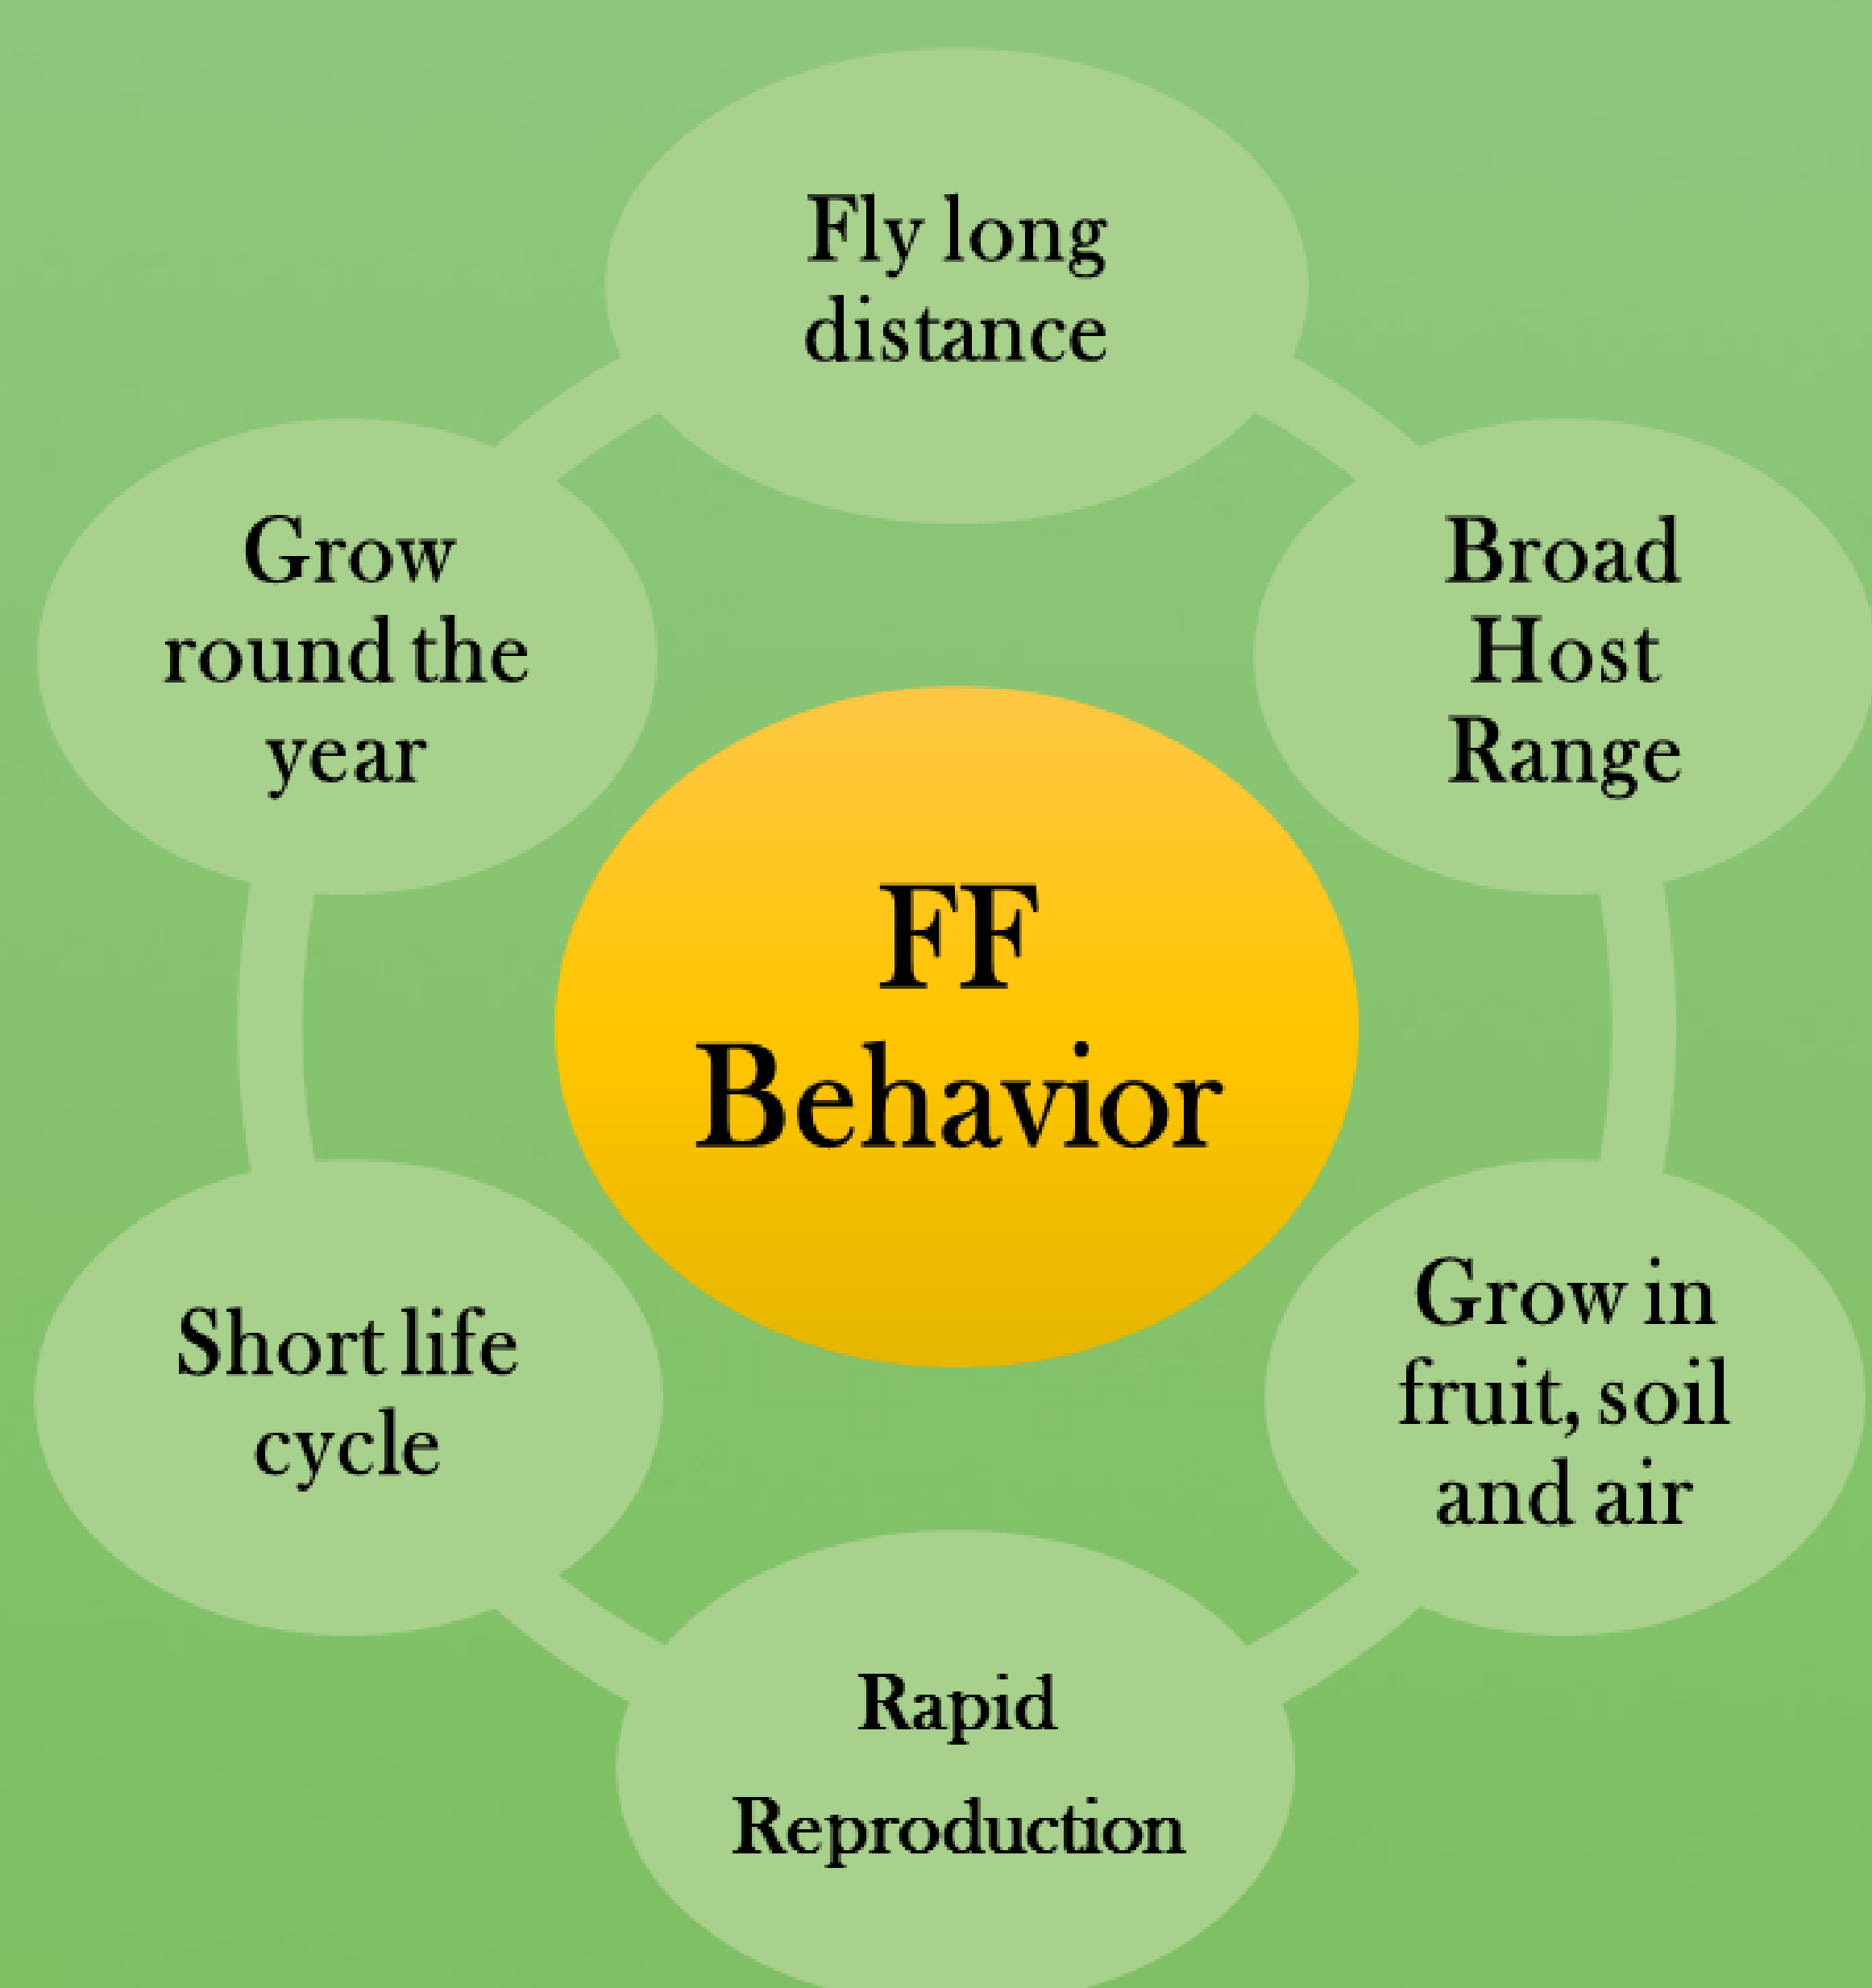

What?

AWCP is an integrated and systematic program using our GREAT® Fruit Fly Bait (GFFB) for Fruit Fly (FF) Control in large areas.

We offer our products at 50% subsidized prices for 1st trial

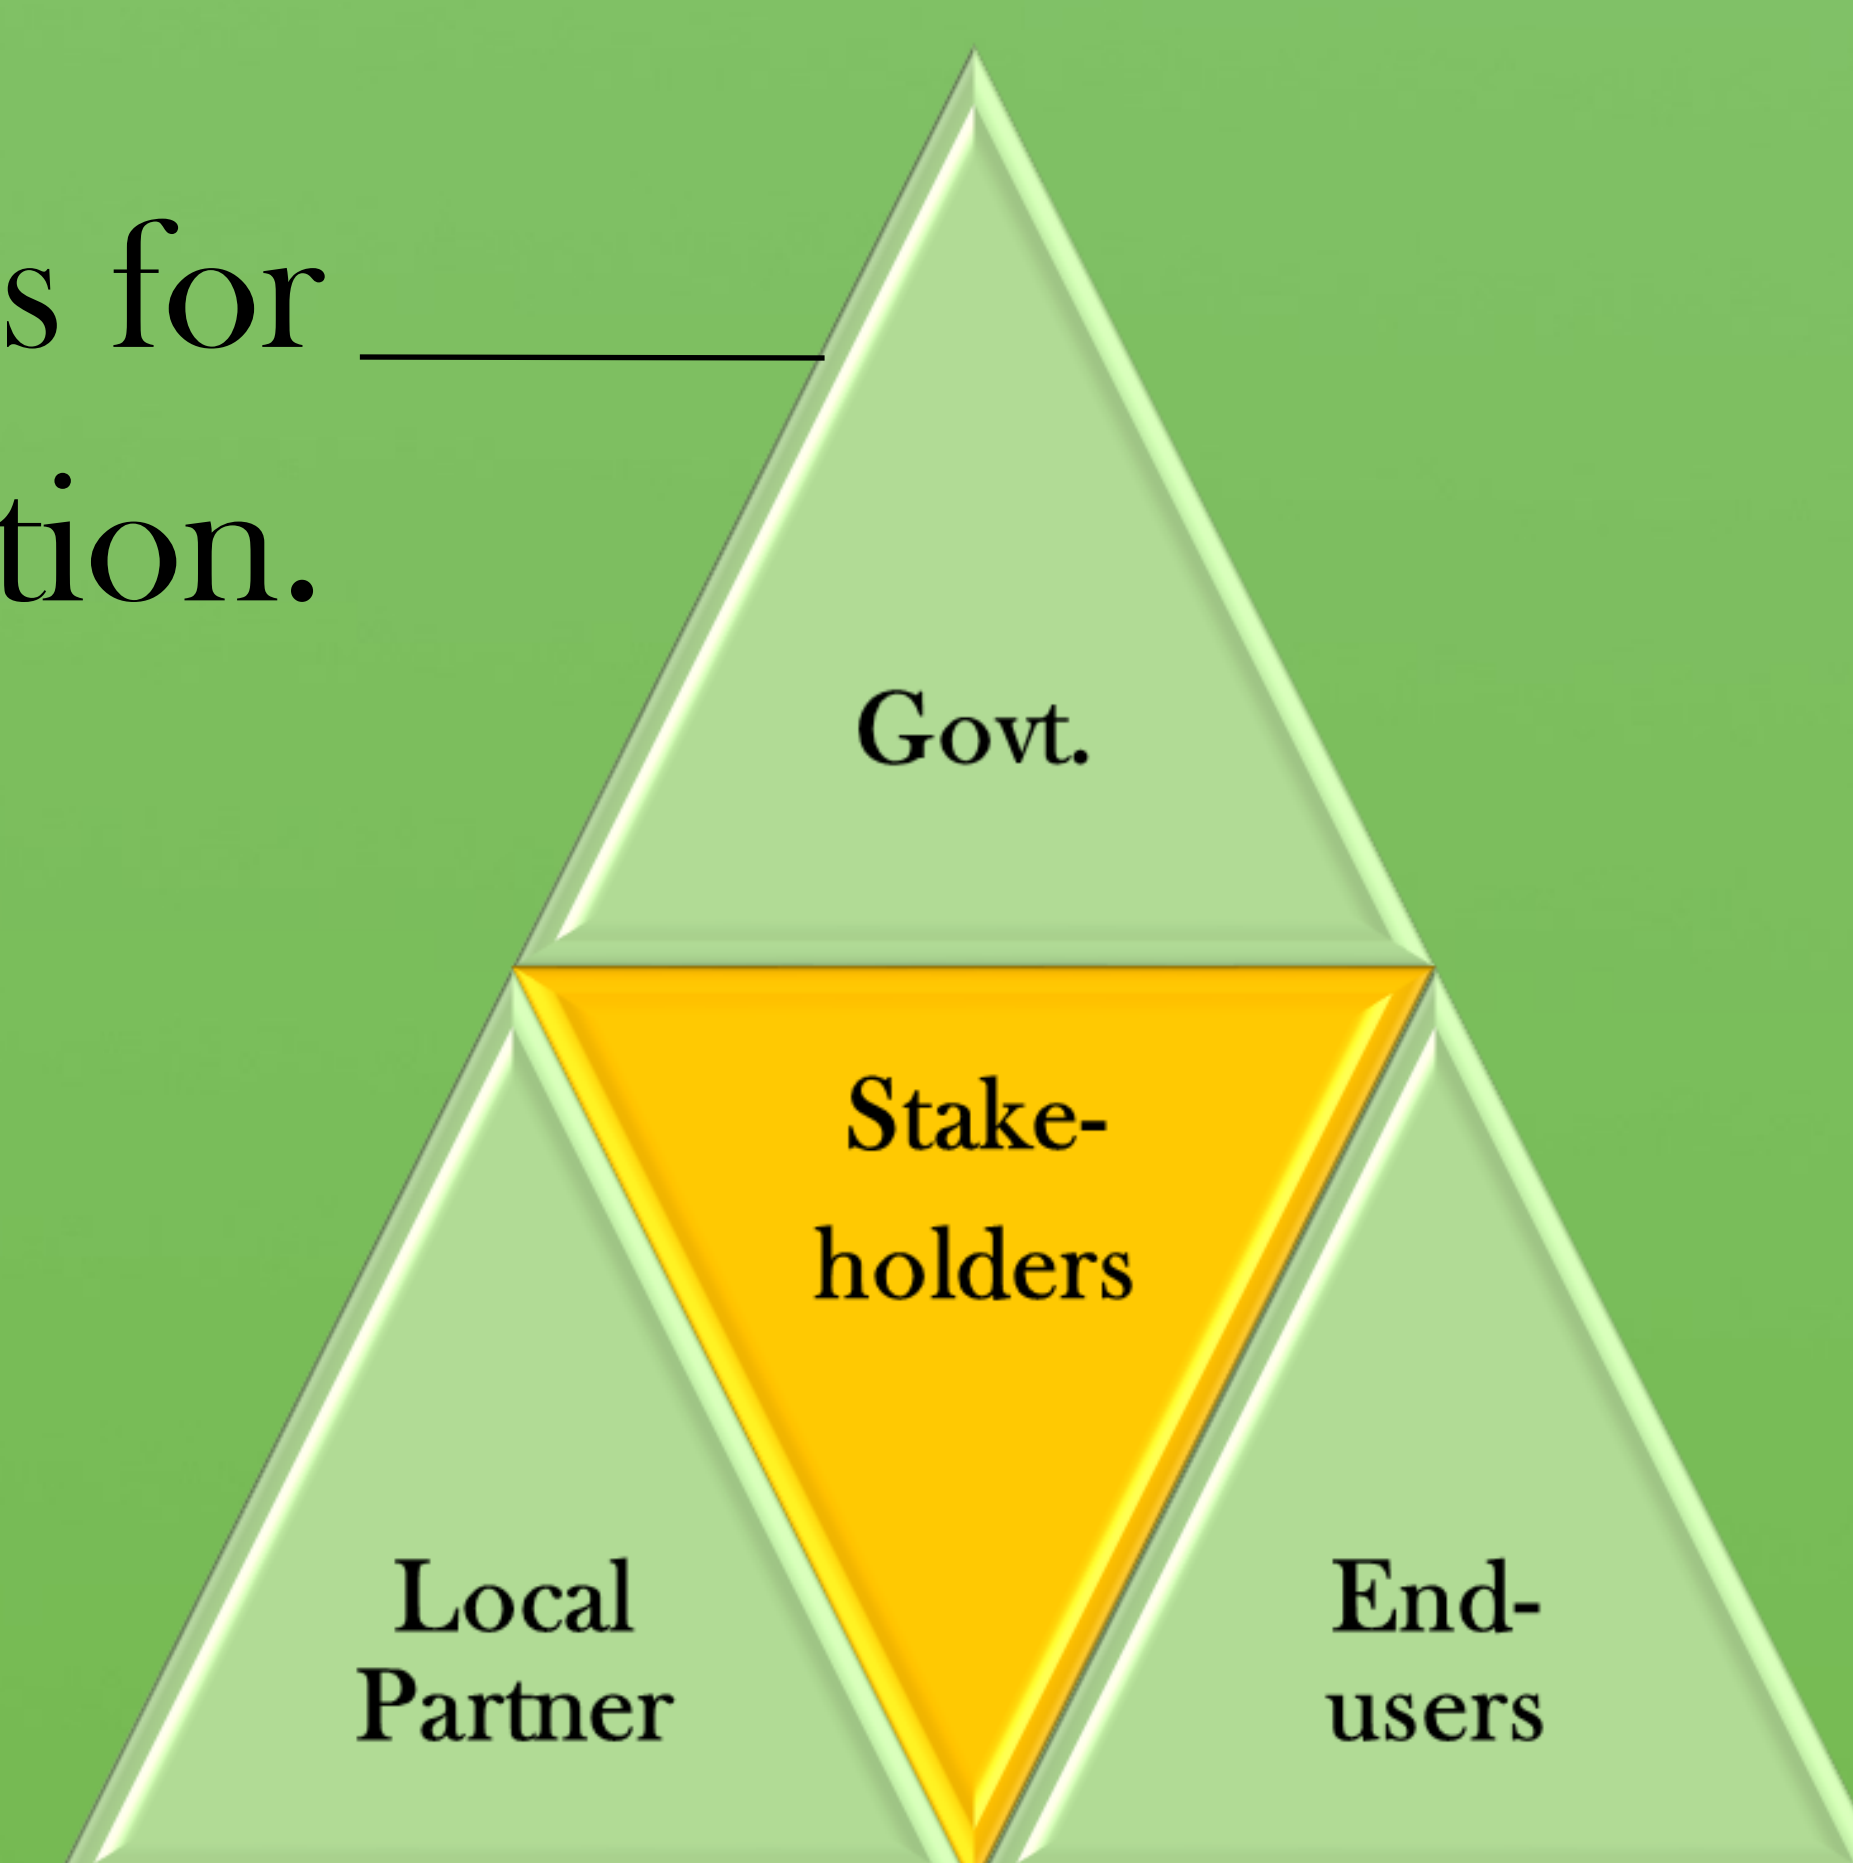

Why?

Why AWCP through MB using GFFB?	
	Easy to apply
	Provide special nutrients to male/female adults after emerging from the pupa
	Less labor intensive - easy to cover large areas in 1 day by point spray method.
	Strong attractant - effective when point sprayed in 60-70 points/acre
	Effective for longer duration. Needs to be reapplied every 5-7 days
	Moist mix makes it easy for FF to feed
	Effective on more than 1 species of FF

AWCP in large areas reduces the FF population density.

Unites stakeholders for an organized action.

How?

- In depth analysis of the trial area
- Training & Organizing
- Technical Support
- Monitoring
- Mass Baiting using GFFB
- Efficacy evaluation
- Meeting with Stakeholders to showcase results
