

GREAT® Fruit Fly Bait (GFFB)

GREAT® Fruit Fly Bait (GFFB) is a unique formula based on the knowledge of the biological behaviors and dynamics of fruit flies, especially their needs for special nutrients after emerging from the pupa. It attracts both male and female flies, and particularly immature females searching for protein food so they can develop their eggs.

PRINCIPLE

Feeding Characteristics

Need plenty of protein after emerging from pupa. Like to feed on wet food.

Spongy Mouthparts

lick

ADVANTAGES

- **Highly Efficient:** Proper application leads to significant reduction in the fruit damage rate
- **Cost Effective:** Income per acre is much higher than the cost of control per acre
- **Environment-Friendly:** No harmful effect on the environment
- **No chemical residues on fruits**
- **Effective against male and female fruit fly population**
- **Not harmful to beneficial insects**
- **Less labor intensive**

EASY USAGE

Dilute with 2 times water and mix well

Spot spray on back of foliage

Spray in a 0.5-1 sq.m area in every 8-10 meters, 60-70 points per acre by spot spray

WHERE TO APPLY?

Spot sprayed on the back of the foliage
